

BOIL WATER NOTICE

TUE, June 27, 8 AM

TUESDAY, June 27, 8 AM – NEW UPDATES

Water pressure and water have been restored to all affected residents and businesses.

The precautionary boil water notice is still in effect while bacteriological samples of the water are tested today through Thursday. Results are expected sometime Thursday.

The City of Groveland wishes to thank the residents and businesses for their patience and understanding while the main line break was repaired at the northern water Plant No. 3. We understand that being without water is stressful and inconvenient. We apologize and promise that we are reviewing the situation to try and prevent any future reoccurrence.

We deeply appreciate Kroger and Niagara Bottling Co. for donating water for our water station. We will continue to keep the water station open at Cherry Lake Park beginning again at 9 AM today until 6 PM or as long as supplies last.

BOIL WATER GUIDELINES

Here are guidelines during a Boil Water Advisory:

- ☐ Use bottled or boiled water for drinking, and to prepare and cook food.
- ☐ If bottled water is not available, bring water to a full rolling boil for one minute (at elevations above 6,500 feet, boil for 3 minutes). After boiling, allow the water to cool before use.
- ☐ Boil tap water even if it is filtered (for example, by a home water filter or a pitcher that filters water).
- ☐ Do not use water from any appliance connected to your water line, such as ice and water from a refrigerator.
- ☐ Breastfeeding is the best infant feeding option. If you formula-feed your child, provide ready-to-use formula, if possible.

Handwashing

- ☐ In many cases, you can use tap water and soap to wash hands during a boil water advisory. Follow the guidance from your local public health officials.
- ☐ Be sure to scrub your hands with soap and water for at least 20 seconds. Then, rinse them well under running water.
- ☐ If soap and water are not available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.

Bathing and showering

- ☐ Be careful not to swallow any water when bathing or showering.
- ☐ Use caution when bathing babies and young children. Consider giving them a sponge bath to reduce the chance of them swallowing water.

Brushing teeth

- ☐ Brush teeth with boiled or bottled water. Do not use tap water that you have not boiled first.

Washing dishes

- ☐ If possible, use disposable plates, cups, and utensils during a boil water advisory.
- ☐ Household dishwashers generally are safe to use if:
 - ☐ The water reaches a final rinse temperature of at least 150 degrees Fahrenheit (66°Celsius), or
 - ☐ The dishwasher has a sanitizing cycle.
- ☐ Sanitize all baby bottles.
- ☐ To wash dishes by hand:
 - ☐ Wash and rinse the dishes as you normally would using hot water.
 - ☐ In a separate basin, add 1 teaspoon of unscented household liquid bleach for each gallon of warm water.
- ☐ Soak the rinsed dishes in the water for at least one minute.
- ☐ Let the dishes air dry completely before using again.

Laundry

- ☐ It is safe to wash clothes as usual.

Cleaning

- ☐ Clean washable toys and surfaces with:
- ☐ Bottled water,
- ☐ Boiled water, or
- ☐ Water that has been disinfected with bleach.

Caring for pets

- ☐ Pets can get sick from some of the same germs as people or spread germs to people. Give pets bottled water or boiled water that has cooled.
- ☐ If bottled water is not available, bring water to a full rolling boil for 1 minute (at elevations above 6,500 feet, boil for 3 minutes). After boiling, allow the water to cool before use.
- ☐ Boil tap water even if it is filtered (for example, by a home water filter or a pitcher that filters water).
- ☐ Do not use water from any appliance connected to your water line, such as ice and water from a refrigerator.

Caring for your garden and houseplants

- ☐ You can use tap water for household plants and gardens.
